<b>Introduction to GCSE specification requirements</b>	To understand the content and requirement of the D&T GCSE specification.	Iterative Context	Students will be introduced to the specification content and mark scheme. This will allow them to highlight early on areas they individually may find more challenging.  Students will analyse a given design context and conduct in depth research led by their own direction to develop their ideas.		
<b>Designing to a brief</b>	To understand how to analyse a design context to develop relevant and innovative design ideas.		Students will analyse a given design context and conduct in depth research led by their own direction to develop their ideas.		
<b>Material properties</b>	To investigate the working properties of natural sustainable materials.		Students will analyse a given design context and conduct in depth research led by their own direction to develop their ideas.
